Things to note

Empty cells

Empty cells are displayed with a pale-yellow background

Invalid cells

Invalid cells are displayed with a red background.

A cell can be invalid for a number of reasons e.g. the times entered may not be interpretable e.g. “9-53” cannot be successfully parsed. However, “9-530” would be parsed to “9AM-530PM”. The location might be incorrect e.g. “9am-5:30pm @OIT” or the specified position might be incorrect.

Warning cells

Warning cells are displayed with an orange background

Warning cells might be shown if the shift is too short, or too long, or start more than 2 hours before the opening hour of the branch etc. Mouse over the cell and the reason the cell is highlighted as a warning will be displayed.

Visiting employees

Visiting employees and shifts are shown with a green background

The box also shown the Agreed to hours and any Additional hours for the week and the difference. **A negative difference means that you have gone over the Agreed to hours + any additional hours.**

Entering times

Times can be entered using several different formats:

9a-5p

9am-5pm

9:00am-5:00pm

You can also enter times without specifying AM or PM e.g.

If multiple times are valid the system will display the possibilities in a dialog for you to double click the intended time.
